SULAIMAN SUDIRMAN

Senior Full-Stack / Backend Developer (PHP & Laravel)

Kuala Lumpur, Malaysia • +60 17-279 2409 • sulaiman.sudirman@gmail.com • i@ss.my

sulai.mn • sulaiman.dev • linkedin.com/in/sulaiman-sudirman • github.com/natsu90 • stackoverflow.com/u/1109004

PROFESSIONAL SUMMARY

Senior Full-Stack Developer with 10+ years of experience building and scaling PHP/Laravel web applications, REST APIs, and business-critical platforms for clients across the US, UK, Australia, Singapore, and New Zealand. Proven track record of taking products from concept to production, including logistics platforms processing over $100,000 in daily transactions and a POS system that drove 2000% client growth. Experienced with modern AI-assisted development tools (Anthropic Claude Code) to accelerate delivery without compromising code quality.

CORE SKILLS

Languages & Frameworks: PHP 7/8, Laravel 5–10, Zend Framework, CodeIgniter, JavaScript, TypeScript, Node.js, Vue.js, Nuxt.js, jQuery, HTML5

Databases: MySQL, MariaDB, PostgreSQL, Microsoft SQL Server, SQLite, Elasticsearch, Redis

APIs & Architecture: RESTful API design, SOAP Web Services, Domain-Driven Design (DDD), WebSocket

DevOps & Tools: Docker, Git, CI/CD, Nginx, IIS, Linux (Ubuntu), Windows Server, PHPUnit, Codeception

AI-Assisted Development: Anthropic Claude Code

PROFESSIONAL EXPERIENCE

Senior Backend Developer | OperateBeyond — United States (Remote)

Remote from New Zealand & Malaysia • Oct 2021 – Dec 2025

Subsidiary of American Trailer World (ATW), providing a CRM platform for trailer dealers across the US and Canada. The business was acquired by competitor LeadVenture in 2025, and unfortunately my role was not continued.

- Fixed and enhanced APIs and CRM platform features supporting approximately 1,000 dealers.
- Pioneered adoption of Codeception for automated testing, improving release confidence across the team.
- Migrated legacy components from Zend Framework to Laravel, improving code quality and long-term maintainability.
- Worked across Laravel 6/10, Nuxt.js, Vue.js, TypeScript, Elasticsearch, and Redis in a fully remote, cross-timezone team.

Software Engineer | Xtracta — New Zealand

Auckland, New Zealand • Jun 2020 – Oct 2021

OCR and AI-powered accounting document processing platform serving clients in Australia, the UK, the US, Canada, and Singapore.

- Enhanced Xtracta's core document-processing pipeline, which handles approximately 5,000 documents daily.
- Deployed critical bug fixes that reduced the document failure rate by 30%.
- Collaborated cross-functionally with the data science team to diagnose and resolve OCR/AI model edge cases.
- Built and maintained features using CodeIgniter, jQuery, MySQL, Docker, NestJS, Node.js, and TypeScript.

Full Stack Developer | Deepsouth Technology — New Zealand

Dunedin, New Zealand (Remote from Auckland) • Jan 2020 – Mar 2020

- Contributed to development of a local crowdfunding investment platform supporting investment rounds up to $500,000.
- Contributed to the platform using Laravel 5, JavaScript, MySQL, jQuery, VueJS, and PHPUnit.

Software Developer | OrangeKloud Inc. — Singapore

Yishun, Singapore • Jul 2017 – Jul 2019

Tech consulting company and Microsoft partner delivering custom solutions integrated with Microsoft products.

- Conceptualised development of a logistics system for Singapore's largest bakery company, processing approximately $100,000 in daily transactions.
- Led development of a logistics system for a furniture company processing approximately $100,000 in weekly transactions.
- Oversaw development of a ride-sharing platform in partnership with the Kenya regional team.
- Delivered solutions using Laravel, VueJS, WordPress, Cordova, SOAP/REST APIs, and Elasticsearch.

Software Engineer | INTEGRIO Business Solutions — Malaysia

Kuala Lumpur, Malaysia • Apr 2016 – Sept 2016

- Supervised development of a project management system for Malaysia's largest Oil & Gas company.

Software Engineer | Terato Tech Sdn Bhd — Malaysia

Bandar Baru Bangi, Selangor, Malaysia • Apr 2015 – Apr 2016

Pioneer in Malaysian mobile app development; revolutionised the local F&B industry with the Slurp POS system.

- Spearheaded backend development of the Slurp POS system, achieving 2000% client growth.
- Led backend development for multiple government agency mobile applications.

Software Engineer | INTEGRIO Business Solutions — Malaysia

Kuala Lumpur, Malaysia • Sept 2013 – Apr 2015

- Co-developed a new ERP system, izeberg.com.

IT Programmer | Asia e University — Malaysia

Kuala Lumpur, Malaysia • Nov 2011 – Dec 2012

A private university specialising in online learning and education.

- Enhanced and managed the university's content management system (CMS) and student management system (SMS), serving 5,000 users.
